

Dear Doctor

Thank you for expressing your interest in joining our team at Doctor Aged Care.

Doctor Aged care is a company that has been set up and designed to offer quality and continuity of care to patients in aged care facilities in a flexible, enjoyable, stress-free and financially rewarding way for the doctors.

You will be responsible for the care of residents in your local aged care facilities thereby reducing the time needed to commute to these facilities to attend to patients.

As you will be the only doctor seeing these patients, there will be continuity of care, you will arrange tests and follow them up yourself thus enhancing patient care and reducing patients lost to follow up and avoiding unnecessary and often irrelevant intervention from other doctors.

This will also allow you to perform efficient consults in a timely manner as you will become very familiar with your patient's medical history.

You will have free access to our cloud based consulting software Helix by Medical Director to allow you to keep medical records of your consults, by copying and pasting your notes from the facility computers into Helix, and being able to access these records on the go from your mobile.

You will be able to do all the comprehensive management plans, 3 monthly reviews and residential medication management reviews for these patients adding to your remuneration for providing your services to these residents. Full guidance and tips will be provided to you on how to make this a streamlined process. There will be no frustration or risk of other doctors billing these item numbers for your patients as often happens in the clinic setting.

You will actually become the family doctor, as you get involved in not only the patient care but also the family dynamics, which is very rewarding when the families appreciate the care you provide for their loved ones and also allows you to provide holistic care to the resident.

Your knowledge will grow exponentially as you see real pathology and learn lots about chronic kidney disease, dementia, BPSD, falls, rashes, and other acute pathology.

Flexibility in this job allows YOU to decide when you want to visit the facilities. You can even visit earlier or postpone visits to a later time in the event of an emergency, take on as much or as little work as you want, and work this job around other work and commitments, though most of our doctors find giving the facility a fixed visit day/time works best as the staff can have everything prepared before your visit.

Free access to Therapeutic Guidelines mobile application.

Full clinical support through access to a private telegram group of doctors where you can post any clinical queries and get prompt advice.

Full admin support to chase up test results, letters, report and to process your referral letters, fax documents for you, batch and transmit your billings and provide timely tax invoices and payment into your account.

Cross-cover when you are away ensuring your patients get the same level of continuity of care when you are away.

Access to our referral scheme so you get 20% of the new doctor's billings for 6 weeks.

We look forward to you joining our team, and please if you require any further information please do not hesitate to contact us on 1300317071 or admin@doctoragedcare.com.au
